## EXECUTIVE CROWD ANALYSIS SUMMARY

| ESTIMATED CROWD COUNT | DENSITY PERCENTAGE | CROWD SAFETY LEVEL | RELIABILITY SCORE |
|-----------------------|--------------------|--------------------|-------------------|
| 64 people             | 32.0%              | MODERATE           | 83%               |

## System Insights & Spatial Metrics

|                     |                                                                                                          |                    |                       |
|---------------------|----------------------------------------------------------------------------------------------------------|--------------------|-----------------------|
| Average Confidence  | 83%                                                                                                      | Small Object Ratio | 26.6%                 |
| Occlusion Indicator | Standard Density                                                                                         | Consensus Strategy | Single Pass NMS_MERGE |
| System Narrative    | Analysis completed on July 29, 2026 - 11:24 PM. Total estimated headcount is 64 people at 32.0% density. |                    |                       |

## Safety Assessment & Actionable Recommendations

### NOTICE: Moderate Crowd Density Observed

- **Monitor Transit Points:** Keep automated monitoring active at escalators, stairwells, and main transit corridors.
- **Maintain Normal Operations:** Current density is manageable; maintain standard security post assignments.
- **Prepare Staging Gates:** Ensure secondary exit routes remain unlocked and unobstructed for peak period surges.
